
iiX; STRATEGIC PARTNERSHIP TO BRING VALUE TO CLIENTS

Manalapan, New Jersey, February 7, 2005: Maple Technologies is pleased to announce its strategic partnership with iiX – Insurance Information Exchange. A member of the ISO family of companies, iiX is a premier provider of motor vehicle records to insurance professionals and employers. iiX also offers credit-scoring and A-PLUS™ Claims History reports to the insurance industry. Maple Technologies is a custom software developer designing ASP-based information systems and applications for property and casualty insurance carriers and managing general agents.

Through the strategic partnership with Maple Technologies, iiX services will now be integrated into Maple's Aspire Information System, seamlessly blending essential third party underwriting validation criteria within the web-based Aspire process.

Nicholas H. Teetelli, CEO of Maple Technologies said, "We are excited in forming this strategic partnership with iiX. Our web-based Aspire information system will now offer added value to our insurance industry clients, providing on-the-go dexterity to complete functional elements of that part of the underwriting process which requires third party validation criteria, such as Motor Vehicle Records. iiX brings a seamless and cost effective integration solution into the Aspire technology plant, offering clients a more efficient business solution to their transactional processing needs."

"iiX is committed to integrating with solution providers like Maple Tech to ensure that our products are available when and where our clients need them," said Sean Quillivan, iiX general manager.
